TERRAFORM-CLOUD-AZURE-TEST

Test Link

https://app.terraform.io/app/erich-ej-best-fl/workspaces/terraform-cloud-azure-test/

The Version Control

 https://gitlab.com/advocatediablo/terraform-cloud-azure-test (Main Branch)

On Run Test, the following resources are created:

1. Resource Group: "ejWinRG".

   Location: "eastus".

2. App Service Plan: **"winappserviceplan".**

3. App Service : **"ejBestWinWebApp"**

   The Repo Url for the source control in the **winapp** branch: https://github.com/ejbest/terraform-cloud-azure-bastion

4. Custom Hostname Binding : **"winapp.waterskiingguy.com"**

5. DNS Cname Record : **"winapp"**

   The record for the app is **"ejBestWinWebApp.azurewebsites.net".** A dns cname **"winapp"** is added in the **"waterskiingguy.com"** zone then the app can be accessed via https://winapp.waterskiingguy.com

   In the Azure portal go to resource groups and select the ejWingRg to check all the resources created.
